

Chitresh Gyanani

Solution Architect • Applied AI/ML & Backend

New Delhi • +91 88820 95604 • gychitresh1290@gmail.com • linkedin.com/in/chitresh-gyanani • github.com/Chitresh-code • gitlab.com/notchitresh • talk to my profile

I turn vague enterprise AI ambitions into systems that actually run. Two years of production RAG, agent orchestration, and backend architecture for clients including UKG and Autodesk, with a habit of instrumenting cost and quality so the business can tell whether the AI is worth it.

EXPERIENCE

Quarks Technosoft

Jun 2025 – Present • Noida

Software Engineer

- Owned AI engineering for enterprise clients including UKG and Autodesk: discovery, architecture, delivery.
- Built RAG pipelines, multi-agent workflows, and AI backend services on containerized Azure/AWS infrastructure.
- Made spend legible with request-level token counting, cost estimation, and success-rate analytics.

OrgLens

Sep 2024 – May 2025 • Noida

Data Analyst

- Modelled organizational data as a Neo4j knowledge graph and paired traversal with retrieval for business Q&A.
- Built Python analytics pipelines turning relationship-heavy data into reporting stakeholders acted on.

SSB Digital

Sep 2024 – Apr 2025 • Remote

Python Developer, promoted from Python Intern

- Built LLM chatbots and automation pipelines, raising response quality via dataset prep and fine-tuning.
- Shipped production Django/Flask APIs and OpenCV vision features in end-to-end inference workflows.

DigiVista Infotech

May 2024 – Aug 2024 • Delhi

Software Developer

- Built Python backend features and internal automation for client web applications.

PERSONAL PROJECTS

LLMGate

2026

Cost-aware LLM gateway: one OpenAI-compatible endpoint over Azure OpenAI, Gemini, and open-weight models, with semantic caching, quality/cost routing, per-tenant budgets, provider fallback, and request-level traces.

PolicyGraph

2026

Graph-grounded RAG over public RBI/SEBI circulars: entity graph plus vector search, clause-level citations, version diffs, and contradiction checks across superseding circulars.

ExtracTable

2025

PDF table extraction at SaaS grade: async Celery pipeline, styled Excel output, JWT auth with strict tenant isolation, and monthly per-user usage and cost tracking.

TOOLKIT

Python • TypeScript • Node.js • SQL • FastAPI • Django/DRF • Flask • Celery • microservices • RAG • embeddings • agent orchestration • fine-tuning • PostgreSQL • MongoDB Atlas Vector Search • Redis • Neo4j • Polars • Azure • AWS • Docker • Kubernetes

EDUCATION & CERTS

B.Tech, Computer Science, Dr. A.P.J. Abdul Kalam Technical University, 2021–2025

Certification in AI & Machine Learning, CCE, IIT Mandi, Jul 2026 – Present

Microsoft Azure AI Essentials • Microservices Foundations (Kong) • Cloud Strategy • Vector Databases (Weaviate) • Docker Foundations • DevOps (PagerDuty)
